

Marley Roofing Update Alcohol Free Policy

Dear Valued Customer/Business Partner

Marley Roofing has a zero-tolerance policy towards alcohol use. As a step in our continuous improvement efforts, the company will now be conducting alcohol breathalyser testing at the factory sites in keeping with the practice at the rest of its operations.

This means that everyone that intends to enter the site will be subject to an alcohol test. Access will be conditional on the outcome of that test.

The procedure will be as follows:

- > Any visitors will be required to blow into an Alcohol Breathalyser Unit
- > If it returns a negative result; access will be granted to the site.
- > If on the other hand, it yields a positive result (positive for alcohol) then a period of 30 minutes will be allowed to elapse before a re-test is conducted. If a negative result is attained on the re-test, then access will be granted. A repeat positive will mean that access is denied.

It is Marley Roofing's intention to ensure the safety of all that interact with our operations and we trust that this measure will be understood in that light. We look forward to your continued support.

Effective from 1st of October 2018.

We know how important it is to find practical information and to keep up with the latest development in Roofing.
