Can't find your colour?  
Ask your store to order!

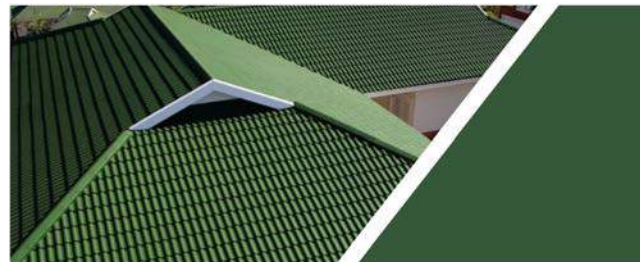

Blue

Burgundy

White

Emerald Green

Moreland Green

Slate

Red

Terracotta

Midnight Black

Brown

Amber

Please note colours are displayed as accurately as printing processes allow. Factors such as lighting conditions, textures and surfaces and angles at which are displayed and viewed may alter colour perceptions. Other factors such as roof pitch, tile/sheeting profiles and lighting conditions may also alter colour preception. We therefore recommend purchasing a 5L product in a colour and formulation of choice as a tester before your bulk purchase. To ensure colour uniformity, we recommend purchasing colours from the same batch or mix paint batches with one another in a seperate clean container.

# Easy steps to the roof finish you want!

1. Simply choose the colour that inspires you the most.
2. Select your formulation of choice.

SPREAD RATE: 7-9m<sup>2</sup> per litre  
APPLICATION: Brush, Roller, Spray  
CLEANING: Water  
DRYING: + - 4 Hours  
COATS: 2 \*White 3

SPREAD RATE: 6-8m<sup>2</sup> per litre  
APPLICATION: Brush, Roller, Spray  
CLEANING: Water  
DRYING: + - 4 Hours  
COATS: 2 \*White 3

**Next Generation Polymer** – Advanced formulation technology that offers decades of protection for multiple surfaces with a 15-year guarantee.

**Extreme Weather, Pollutant & UV Resistant** – Colour fast, dirt shedding and impervious to water & acid rain for long lasting colour aesthetics.

**Superior Adhesion & Flexibility** – Paint film remains intact during expansion and contraction for ultimate sealed protection.

**Multi-Surface Application** – Ideal for roofs, walls, paving and trims.

**Multiple Application Methods** – Ready to use for airless spray, brush or roller application. No thinning required!

**Acrylic Formulation** – Highly durable roof formulation with a 10-year guarantee.

**All weather & UV Resistant** – Colour fast, dirt shedding and impervious to water that keeps your roof looking better for longer.

**Excellent Adhesion & Flexibility** – Paint film remains intact during expansion and contraction for long lasting sealed protection.

**Multiple Application Methods** – Ready to use for airless spray, brush or roller application. No thinning required.
